PROFESSIONAL SUMMARY

Computer Science Engineering (Data Science) graduate with proficiency in Java, Python, SQL, and software development. Hands-on experience in data engineering, database management, and cloud technologies through projects and internships. Passionate about solving real-world problems and building reliable, scalable applications.

EDUCATION

- St. Joseph Engineering College** Mangalore , India
Computer Science Engineering – Data Science.; GPA: 8.74 2022 - June 2026
Courses: Data Structures, Analysis Of Algorithms, Big Data, Database Management System, UI/UX, AIML
- Vivekananda College** Puttur, DK, India
Pre-University Course (PCMB); Grade: 89% 2020 - June 2022

SKILLS SUMMARY

- Languages:** Python, Java, SQL
- Tools:** Docker, React, GitHub, MongoDB, MySQL, Figma, Databricks
- Platforms:** Linux, Windows, AWS
- AI Tools:** Claude, Gemini, Antigravity
- Soft Skills:** Leadership, Event Management, Time Management

EXPERIENCE

- Data Engineer Intern, InternAge** Remote
Student Intern February 2026 - May 2026
 - Designed and orchestrated automated data preprocessing and transformation workflows utilizing pySpark and Databricks to handle large-scale datasets.
 - Formulated optimized SQL queries to extract, clean, and analyze high-volume structured datasets, reducing query execution latency.
 - Contributed to the development and maintenance of scalable ETL pipelines and cloud platform components to ensure robust data ingestion.

PROJECTS

- Verichain: GenAI-Powered Blockchain Evidence Manager (Hyperledger Fabric, IPFS, Zero-Knowledge Proofs, AI-verified chain of custody):** Architected a decentralized, GenAI-powered evidence manager utilizing Hyperledger Fabric and IPFS, ensuring 100% immutable chain-of-custody tracking.
- BuildConnect: Construction Marketplace Platform:** Engineered a multi-tier marketplace platform using a relational database and role-based access control (RBAC), streamlining verification, hiring workflows, and connections between property owners and verified contractors.
- Employee Leave Management System: (Python, Docker, SQLite):** Developed a secure Employee Leave Management System using FastAPI and SQLite, implementing RESTful APIs for leave application, approval workflows, and leave balance management.

CERTIFICATIONS

- Data Analysis with Python:** freeCodeCamp — 300-Hour Developer Certification (March 2025)Covered advanced data manipulation, statistical analysis, exploratory data analysis (EDA), and data visualization utilizing the Python ecosystem.
- Workshop on Data Science with Pandas:** IEEE SJEC Student Chapter — St. Joseph Engineering College (October 2024)Engaged in a concentrated technical workshop focused on data manipulation, dataframe operations, and exploratory data analysis (EDA) using Python’s Pandas library.
- UI/UX Workshop:** ICBS Department, St. Joseph Engineering College (January 2024)Participated in a specialized workshop focusing on user interface design principles, user experience workflows, and wireframing best practices for application development.

VOLUNTEER EXPERIENCE

- NSS Unit Member & Volunteer:** Tiara & Milan (2023, 2024) – Managed event logistics, public relations, and cross-functional team operations for college festivals.

AWARDS AND LEADERSHIP

- 3rd Place, VTU Mangalore Zone Kabaddi Tournament (2023):** Developed team coordination and strategic execution under pressure.
- Core Competitor, College Kho-Kho Team:** Contributed to overall athletic ranking through structured tactical planning.
